PROFILE

Computer Engineering undergraduate at NIAMT Ranchi with a strong foundation in programming languages, full-stack web development, Salesforce platform engineering, and cybersecurity. Proficient in developing practical solutions using C, C++, Java, JavaScript, the MERN stack, and Salesforce technologies, including Salesforce DX, Apex, and Flow automation. Demonstrates strong adaptability, a continuous learning mindset, and a keen interest in solving real-world technical challenges.

EDUCATION

B.Tech in Computer Engineering 2023–2027 (Ongoing)
NIAMT Ranchi CGPA: 8.65

Senior Secondary (CBSE) 2022
SRK D.A.V. Public School, Suriya, Giridih 81%

SKILLS

- **Languages:** C, C++, Java, JavaScript, Apex, React.js
- **Development:** MERN Stack, Salesforce DX
- **Tools and Platforms:** GitHub, MS Office, Kali Linux, Vercel, Render
- **Database:** MongoDB, MySQL, Salesforce Custom Data Model
- **Other:** Cybersecurity, JWT Authentication, Google OAuth 2.0

PROJECTS

Hospital Operations & Management CRM | Salesforce, Apex, Flows, Antigravity AI GitHub

- Developed a Salesforce Hospital Management System by integrating multiple custom objects through Salesforce relationships to establish a structured business CRM data model.
- Leveraged Antigravity AI to assist in designing Salesforce Flows, including Screen Flows for patient registration and appointment booking, Record-Triggered Flows for automated billing upon appointment completion, and doctor availability updates to prevent double booking.
- Implemented Scheduled Flows to automate daily appointment reminders and configured OWD, sharing rules, and role-based access controls to secure patient and billing information.
- Created reports and dashboards to monitor department-wise revenue, doctor availability, and patient consultations.

Railway Shift Management System | Frontend Development Live Demo GitHub

- Contributed to the group project by designing and developing the frontend interface for railway shift management.
- Added real-time duty hour alerts at 8, 9, 11, and 14 hours using Socket.IO.
- Implemented role-based access control (Super Admin, Admin, User) with JWT authentication.
- Features: live dashboard, shift lifecycle management, Excel export, duty audit logs, crew relief planning.

Mini eKart App | MERN Stack, JWT, Google OAuth 2.0, Razorpay Live Demo GitHub

- Developed a full-stack e-commerce application featuring product listings, shopping cart, order management, checkout, and an admin panel for product and user management.
- Implemented secure authentication using JWT and Google OAuth 2.0, with Nodemailer-based email verification to validate user email addresses.
- Integrated Multer and Cloudinary for product image uploads and cloud storage, and Razorpay for secure online payment processing.

ACHIEVEMENTS

- Sports Secretary, SFU Gymkhana, NIAMT Ranchi (2025–2026).
- Technical Leader, Code Forge, NIAMT Ranchi (Cybersecurity and Blockchain community).
- Cultural Head, Mission Kartavya Foundation (NGO).
- Winner and runner-up in various football and chess tournaments.

CERTIFICATIONS & EXPERIENCE

- Salesforce CRM Certification – Teqfocus, Ranchi.
- Railway Shift Management Project Certification – Hatia, Ranchi.
- Web Development Certification – Internshala.
- Cybersecurity and Blockchain Certification – NIAMT.
- Organized technical workshops on Kartavya-Tech and cybersecurity.
- Organized sports and cultural events, developing leadership and teamwork skills.
